Kush Patel

Mechanical Engineering MEng student at the University of Liverpool with experience in engineering modelling, programming, and practical technical projects. Developed a Kotlin-based aerofoil analysis application using thin airfoil theory and contributed to a floating vertical-axis wind turbine project involving electrical power generation and system integration.

EDUCATION

UNIVERSITY OF LIVERPOOL
Mechanical Engineering (MEng)
2023 - Current

TWYFORD CHURCH OF ENGLAND HIGH SCHOOL

(A-Levels)

B - Mathematics
B - Physics
C - Computing

2021 - 2023

SKILLS

Technical Skills

- Engineering Software: MATLAB, Simulink, PTC Creo, ANSYS
- Programming: Kotlin, Javascript, Python
- Practical Skills: Welding and Joining, power tools, workshop experience
- Other: Microsoft Suite, Typing (75 WPM)

Soft Skills

- Multitasking
- Attention to Detail
- Problem-Solving
- Time Management
- Collaboration
- Teamwork
- Adaptability
- Critical Thinking

INTERESTS

- Sports including Basketball, Football and Skiing
- Grade 4 Guitar
- Ancient History

VOLUNTEERING

Positive Lamb
Charity Organisation | 07/2021 - 08/2021

- Helped to set up charity fundraising events.
- Participated in multiple sponsored walks (21km) around London.

PROJECTS

Airfoil Analysis App - Personal Engineering Project

09/2025 - 04/2026

- Designed and developed a mobile application using Kotlin / Android Studio to analyse NACA 4-digit airfoils using thin airfoil theory.
- Implemented numerical methods to calculate lift coefficient and zero-lift angle under varying geometries and angles of attack.
- Built interactive visualisations for airfoil shape and lift curve behaviour.
- Applied aerodynamic theory, programming, debugging, and UI design to deliver a functional engineering tool.

Floating Vertical Axis Wind Turbine - Group Engineering Project

09/2025 – 05/2027 Github: https://github.com/KushP103/AirFoilApp

- Contributed to the electrical subteam developing the power generation and energy conversion system for a floating VAWT prototype.
- Investigated AC generation, rectification, and power delivery through practical circuit testing and Simulink modelling.
- Collaborated with blade and float subteams to consider electrical system requirements and integration.

EXPERIENCE

Service Desk Analyst

Foxtons, London | 07/2025–12/2025

- Reimaged over 50 laptops for new starters and replacements, ensuring devices were fully configured and secure.
- Reassigned over 1,300 desk phones to the correct offices across London, improving communication setup and user access.
- Provided first-line technical support to employees, resolving issues related to laptops, both in person and remotely.
- Delivered clear and concise step-by-step guidance to non-technical users, improving issue resolution and reducing repeat queries.

Plumbing Apprentice

Ramki, London | 06/2022-08/2022

- Assisted in maintaining clean and organised worksites, supporting efficient project completion.
- Gained practical exposure to plumbing systems, pipework, and pressure-related equipment while working with tools and following site safety procedures.
- Developed proficiency with power tools such as drills and pipe cutters, while adhering to safety standards.
- Delivered helpful service to ensure smooth collaboration among site teams.

Recreational Assistant

EveryoneActive,London | 05/2022 – Current

- Supervised and guided junior participants in the gym, ensuring safe equipment usage. Managed multiple roles (reception, bar, and kitchen) to meet operational demands efficiently.
- Performed routine safety inspections to maintain compliance with health and safety standards.
- Gained customer relations experience by assisting guests, managing POS transactions, and providing support.
